

FINANCIAL REPORT

Rio de Janeiro
February 27th, 2018

2018 Results*:

Derived from audited consolidated financial information reviewed by independent auditors, stated in millions of U.S. dollars, prepared in accordance with International Financial Reporting Standards - IFRS issued by the International Accounting Standards Board - IASB.

Sales revenue increased by 8% to US\$ 95,584 million, reflecting higher domestic oil products prices, mainly diesel and gasoline and exports, accompanied by a 31% increase in the Brent price despite the depreciation of 14% in the Brazilian real. In spite of the higher volume of diesel sales, there was a drop in the domestic volume of oil products sales of 3% and exports of 10% due to lower production of oil.

When the Brazilian real appreciates relative to the U.S. dollar, the effect is to generally increase both revenues and expenses when expressed in U.S. dollars. When the Brazilian real depreciates relative to the U.S. dollar, the effect is to generally decrease revenues and expenses when expressed in U.S. dollars. The foreign exchange translation effects on the Company's results are shown in item VII - Foreign Exchange Translation Effects on Results of Operations in 2018.

There was an increase in selling expenses, mainly due to foreign exchange translation effects. There was also a reduction in general and administrative expenses.

Net income in 2018 was US\$ 7,340 million, equivalent to US\$ 0.56 EPS, reflecting higher operating income and improved financial results, due to lower interest expenses as a result of lower indebtedness and higher due to the renegotiation of debts of the electric sector.

Net cash provided by operating activities reached US\$ 26,731 million in 2018, a 3% decrease from 2017.

Adjusted EBITDA reached US\$ 31,772 million, an increase of 32%, because of higher margins in domestic and export sales, in line with the increase in Brent and the reduction in operating expenses.

Free cash flow of US\$ 15,173 million was 9.5% higher than 2017, reflecting the increase in proceeds from divestments.

The investments totaled US\$ 12,666 million in 2018, lower than the estimate for 2018-2022 business plan, due to delays in activities related to the construction of platforms, which led to the postponement of a few months of start-up and delays in drilling and completion of wells in fields given the requirements for environmental licensing.

The divestments resulted in a cash inflow of US\$ 5,716 million, especially the partnership projects with Equinor in the Roncador field, Total in Lapa and Iara and Murphy in the Gulf of Mexico.

Petrobras reached the net debt target of US\$ 69,378 million at the end of 2018 and the net debt / adjusted EBITDA (in Brazilian real), reaching 2.32, below the target of 2.5.

* Additional information about operating results of 2018 x2017, see "Additional Information" item II.

This release may contain predictions regarding future events. Such predictions reflect only expectations of the Company management regarding future economic conditions, beyond those within the industry, the performance and financial results of the Company, among others factors. The terms “anticipate”, “believe”, “expect”, “predict”, “intend”, “plan”, “project”, “aim”, “should”, as well as other like terms, aim to identify such predictions which evidently involve risks and uncertainty, predicted by the Company or not, and consequently, are not guaranties of future results of the Company. Therefore, future results of the Company operations may differ from current expectations, and readers should not exclusively rely on information contained here. The Company undertakes no obligation to update these presentations and predictions in light of new information or future events. The numbers presented for 2019 and beyond are estimates or goals. In addition, this presentation contains some financial indicators that are not recognized by GAAP or the IFRS. These indicators do not have standardized meanings and may not be comparable to indicators with a similar description used by other companies. We provide these indicators because we use them as measures of performance of the Company; they should not be considered in isolation or as a substitute to any other financial metric that may have been disclosed in accordance with GAAP or the IFRS.

Total	3,147	3,327	(5)

* See definition of Capital Expenditures, Adjusted EBITDA, Adjusted EBITDA Margin, Gross Margin, Operating Margin and Net Margin in glossary and the reconciliation in Reconciliation of Adjusted EBITDA and Net Debt/Adjusted EBITDA metric.

** International sales (excluding export sales), which consist of sales of crude oil, natural gas and oil products that are purchased, produced and refined abroad.

II. Results of Operations of 2018 compared to 2017

The main functional currency of the Petrobras Group is the Brazilian real, which is the functional currency of the parent company and its Brazilian subsidiaries. As the presentation currency of the Petrobras Group is the U.S. dollar, the results of operations in Brazilian reais are translated into U.S. dollars using the average exchange rates prevailing during the period. For detailed information about foreign exchange translation effects on the Company's income statement, see item VII "Foreign Exchange Translation Effects on Results of Operations of 2018".

Sales revenues were US\$ 95,584 million in 2018, an 8% increase (US\$ 6,757 million) when compared to US\$ 88,827 million in 2017, mainly due to:

- Increase in domestic revenues (US\$ 2,686 million), mainly as a result of:
 - ✓ Increase in oil products revenues (US\$ 4,944 million), primarily reflecting an increase in the average prices of diesel, gasoline and other oil products following the increase in international prices, as well as an increase in diesel sales volume due to lower imports from competitors. These effects were partially offset by the decrease in sales volume mainly for gasoline, due to a higher portion of ethanol in fuel market, as well as lower sales of naphtha to Braskem;
 - ✓ Decrease in electricity revenues (US\$ 1,516 million), following lower prices when expressed in U.S. dollars;
- Higher export revenues (US\$ 2,850 million), driven by an increase in international prices of crude oil and oil products and by higher volume of gasoline export due to the higher market share of ethanol in the domestic market, partially offset by the decrease in crude oil volume exported due to lower production; and

- Higher revenues from operations abroad (US\$ 1,221 million) following higher international prices.

Cost of sales was US\$ 61,517 million in 2018, a 2% increase (US\$ 1,370 million) compared to US\$ 60,147 million in 2017, mainly due to:

- Higher production tax expenses and import costs of crude oil, oil products and natural gas, due to higher international prices. Production taxes were also impacted by increased production in fields with higher special participation rates;
- Increased costs from operations abroad, following higher international prices;
- Higher share of crude oil imports on feedstock processed and of LNG on sales mix, due to lower production; and
- Foreign exchange translation effects partially offset the aforementioned factors due to the decrease of the average cost of sales when expressed in U.S. dollars, reflecting the depreciation of the average Brazilian real.

Selling expenses were US\$ 4,631 million in 2018, a 2% increase (US\$ 93 million) compared to US\$ 4,538 million in 2017, mainly due to:

- Increased impairment of trade and other receivables, primarily relating to companies from the electricity sector;
- Higher expenses with LNG regasification terminals and coastal navigation services (cabotage); and
- Higher transportation charges, due to the payment of tariffs for the use of third party gas pipelines, following the sale of Nova Transportadora do Sudeste (NTS) in April 2017.

General and administrative expenses were US\$ 2,455 million in 2018, a 16% decrease (US\$ 463 million) compared to US\$ 2,918 million in 2017, mainly due to lower expenses with outsourced consulting, IT and administrative services, following financial discipline of controlling expenses.

Exploration costs were US\$ 524 million in 2018, a 35% decrease (US\$ 276 million) compared to US\$ 800 million in 2017, mainly due to lower exploration expenditures written off with projects without commercial feasibility (US\$ 192 million) and to decreased provisions related to contractual penalties arising from local content requirements (US\$ 91 million).

Other taxes were US\$ 752 million in 2018, a US\$ 1,091 million decrease compared to US\$ 1,843 million in 2017, mainly as a result of the Company's decision, in 2017, to benefit from the Tax Settlement Programs which generated an expense of US\$ 883 million in that year.

Impairment of assets in the amount of US\$ 2,005 million was recognized in 2018 mainly for E&P and RTM assets (US\$ 1,391 million and US\$ 442 million, respectively), primarily driven by higher estimates of decommissioning costs in producing properties in Brazil, the sale of production fields in Gulf of Mexico and lower freight rates forecasts pertaining to transportation assets. In 2017, impairment charges of US\$1,191 million were mainly related to RTM and Gas & Power assets (US\$781 million and US\$446 million, respectively), mainly due to higher costs of raw materials and the lower refining margin projection, as well as the lower expectation of a successful sale of fertilizers and nitrogen products plants.

* For detailed information about foreign exchange translation effects on the Company's income statement, see item VII "Foreign exchange translation effects on results of operations of Jan-Dec/2018".

Other income and expenses totaled US\$ 5,626 million in expenses in 2018, a US\$ 27 million increase compared to the US\$ 5,599 million in expenses in 2017, mainly due to:

- The agreement to settle Lava Jato Investigations with U.S. Authorities (US\$ 895 million) in the 3T-2018;
- An increase provision for legal, administrative and arbitration proceedings (US\$ 1,142 million), mainly affected by: i) unitization agreements with ANP related to the Parque das Baleias complex entered into in 4Q-2018 (US\$ 928 million); and ii) arbitration in the United States for drilling service agreement related to Titanium Explorer (Vantage) drillship (US\$ 698 million). These factors were partially offset by reversal of provision related to proceedings regarding the agreement to settle tax debts with the State of Mato Grosso in the 3Q-2018 (US\$ 347 million), as well as the reversal of disputes involving state taxes after joining Rio de Janeiro State Tax Amnesty Program in the 4Q-2018 (US\$ 319 million);
- Losses on the fair value of commodities put options related to the hedge of part of crude oil production (US\$ 409 million) that were made in 2018;
- These increases in other expenses were partially offset by expenses in 2017 related to the agreement to settle the Class Action in the United States (US\$ 3,449 million); and
- Decrease in the net gain on the sale and write-off of assets (US\$ 1,079 million), mainly driven by the US\$ 1,952 million gain on sale of interests in NTS recognized in 2017, partially offset by the gains, in 2018, on sale of Lapa and Iara fields (US\$ 689 million) and by the contingent payment received for the sale of Carcará area (US\$ 300 million).

Net finance expense was US\$ 5,857 million in 2018, a 41% decrease (US\$ 4,038 million) when compared to the expense US\$ 9,895 million in 2017, mainly due to:

- Lower debt interest and charges (US\$ 1,161 million) due to lower interest expenses following pre-payment of debts;
- Financial income recognized in 2018 based on the agreements reached and conclusion of the privatization process of companies in the electricity sector (US\$ 1,418 million); and
- Finance expenses in 2017 following the Company's decision to benefit from Brazilian federal settlement programs (US\$ 837 million).

There were positive results in equity-accounted investments of US\$ 523 million in 2018, a 22% decrease (US\$ 150 million) compared to US\$ 673 million in 2017, due to lower results in associates of the petrochemical sector, notably Braskem.

Income tax expenses were US\$ 4,684 million in 2018, a 156% increase (US\$ 2,856 million) compared to US\$ 1,828 million in 2017, as a result of higher taxable income (before taxes) of the period and of the non-deductible expenses of agreements with U.S. authorities to close investigations related to Lava Jato Operation, partially offset by the tax benefits from the deduction of interest on capital distribution and by the Company's decision, in 2017, to benefit from the Tax Settlement Programs (*Programas de Regularização de Tributos Federais*).

EXPLORATION & PRODUCTION (E&P)

2018 x 2017

The production of oil, LNG and natural gas was 2,628 thousand barrels of oil equivalent per day (boed), in line with the target established for this year, highlighting the start-up of four new production systems: P-74, FPSO City of Campos dos Goytacazes, P-69 and P-75. In relation to the previous year, production decreased by 5%, mainly due to disinvestments in the fields of Lapa and Roncador, the end of the Early Production Systems of Tartaruga Verde and Itapu, as well as the natural decline of production.

Even with lower production, there was an increase in operating income due to the effects of higher Brent prices. In addition, we had greater impairment and higher expenses with production taxes and judicial agreements and contingencies, mitigated by the positive result with dismantling of areas.

The lifting cost decreased 4%, mainly due to lower expenses with interventions in wells. In addition, there were higher government participation expenses because of the increase in international oil prices (31%) and increased production in areas where there is a high rate of special participation

REFINING, TRANSPORTATION AND MARKETING (RTM)

2018 x 2017

There was a significant increase in diesel sales (+13%) and a reduction in gasoline sales due to the greater competitiveness of hydrated ethanol, while having a stable oil products sales. Following the demand, the production of oil products was at the same level of the previous year, reaching 1,764 thousand barrels per day, with highlight to the higher production of diesel (3%).

There was a reduction in the net export of petroleum due to the lower production and greater participation of imported petroleum in the processed cargo. Net exports of oil products increased due to reduced imports of naphtha to Braskem and increased gasoline exports, partially offset by higher imports of diesel and Jet Fuel.

Operating income was reduced due to the lower margin of oil products, mainly gasoline, diesel and LPG, and higher selling expenses, partially offset by inventories formed at lower prices and lower impairment.

The implementation of cost optimization measures resulted in a reduction in the unit cost of refining.

Gas & Power Summary financial information and Main Indicators

	US\$ million

Capital expenditures * of the segment	433	1,127	(62)
Physical and financial indicators**			
Electricity sales (Free contracting market - ACL) - average MW	832	788	6
Electricity sales (Regulated contracting market - ACR) - average MW	2,788	3,058	(9)
Generation of electricity - average MW	2,205	3,165	(30)
Electricity price in the spot market - Differences settlement price (PLD) - US\$/MWh	77	100	(23)
Domestic natural gas available (Mbbbl/d)	307	338	(9)
Imports of LNG (Mbbbl/d)***	43	32	34
Imports of natural gas (Mbbbl/d)	139	151	(8)

* See definition of Capital Expenditures, Adjusted Ebitda and Adjusted Ebitda Margin in Glossary and reconciliation in statement Reconciliation of Consolidated Adjusted EBITDA by Segment.

** Imports of regasified LNG have been considered as from the RMF 2Q-2018. Until the RMF 1Q-2018, it considered imports of LNG, regardless of its regasification within the analyzed period.

GAS & POWER (G&P)

2018 x 2017

Sales of natural gas to the non-thermoelectric market showed a 5% increase, due to the improvement in industrial activity, while sales to the thermoelectric market registered a decrease of 21%. With regard to energy, the highest sales volume in the Free Contracting Environment was due to new sales opportunities in the short-term market.

The reduction of PLD is a reflection of the higher rainfall in the beginning of the rainy period, due to this favorable hydrological scenario, the energy generation was inferior to the previous year.

Despite the positive effect of higher natural gas sales margins, the Operating Income decreased due to the increase in selling expenses with the payment of tariffs for the use of pipelines of the Southeast grid (NTS).

DISTRIBUTION

2018 x 2017

The decrease in the Operating Income was due to foreign exchange translation effects partly offset by the reversal of the provision for losses on lawsuits arising from the Settlement Agreement signed with the State of Mato Grosso. The same factors explain the Adjusted EBITDA.

IV. Liquidity and Capital Resources

Free cash flow*	15,096	13,850

As of December 31, 2018, the balance of cash and cash equivalents was US\$ 13,899 million and the balance of adjusted cash and cash equivalents was US\$ 14,982 million. The resources from cash provided by operating activities of US\$ 26,353 million, proceeds from financing of US\$ 10,950 million, proceeds from divestments of US\$ 5,716 million were used for repayment of financing (and interest payments) and for capital expenditures.

Net cash provided by operating activities decreased to US\$ 26,731 million, as a result of foreign exchange translation effects, payment of two installments of the agreement to settle the Class Action and lower sales volumes, partially offset by higher margins in domestic sales of oil products and oil exports. Investments in the company's business were US\$ 12,070 million in 2018, with 87% of the investments destined to the exploration and production segment. These same factors resulted in positive Free Cash Flow for the fifteenth consecutive quarter, from US\$ 15,173 million in 2018, an increase of 114%.

From January to December 2018, proceeds from financing amounted to US\$ 10,950 million, in part as a result of: (i) funds raised from the domestic and international banking market in the amount of US\$ 7,513 million with maturities between 4.5 and 6.5 years; (ii) global notes issued in the capital market in the amount of US\$ 1,962 million and maturing in 2029; and (iii) proceeds from Export Credit Agency amounting to US\$ 1,041 million.

In addition, the Company paid debts: (i) US\$ 13,943 million relating to the repurchase of global bonds previously issued by the Company in the capital market, with net premium paid to bond holders amounting to US\$ 329 million; (ii) pre-payment of banking loans in the domestic and international market totaling US\$ 15,480 million; and (iii) pre-payment of US\$ 1,356 million with respect to financings with BNDES.

Principal and interest amortizations in 2018 were US\$ 34,054 million and US\$ 5,800 million, respectively, and amounted to US\$ 39,854 million, and the nominal (cash vision) flow of principal and interest on financing, by maturity, is presented in millions:

Maturity	2019	2020	2021	2022	2023	2024 and thereafter	Balance on December 31, 2018	Balance on December 31, 2017
Principal	2,408	4,069	7,148	10,441	12,118	49,095	85,279	110,530
Interest	4,952	4,839	4,574	4,148	3,516	29,330	51,359	60,728
Total	7,360	8,908	11,722	14,589	15,634	78,425	136,638	171,258

* See reconciliation of Adjusted Cash and Cash Equivalents in Net Debt and definitions of Adjusted Cash and Cash Equivalents and Free Cash Flow in Glossary.

V. Consolidated debt

As of December 31, 2018, the total debt in U.S. dollars decreased 23% mainly due to the amortization of debt. Net debt decreased by 18% and the average maturity of debt was 9.14 years (8.62 years as of December 31, 2017). The average rate of funding increased to 6.2% in 2018 from 6.1% in 2017.

Current debt and non-current debt include finance lease obligations of US\$ 23 million and US\$ 162 million as of December 31, 2018, respectively (US\$ 25 million and US\$ 204 million on December 31, 2017).

The net debt to Adjusted EBITDA * ratio decreased from 3.53 in 2017 to 2.20 in 2018, mainly due to the proceeds from divestments and positive free cash flow.

VI. Reconciliation of Adjusted EBITDA and Net Debt/Adjusted EBITDA Metric

LTM Adjusted EBITDA reflects the sum of the last twelve months of Adjusted EBITDA and represents an alternative measure to our net cash provided by operating activities and is computed by using the EBITDA (net income before net finance income (expense), income taxes, depreciation, depletion and amortization) adjusted by items not considered part of Company's primary business, which include results in equity-accounted investments, impairment, cumulative foreign exchange adjustments reclassified to the income statement and results from disposal and write-offs of assets.

In calculating Adjusted EBITDA for 2018, we adjusted our EBITDA for the period by adding foreign exchange gains and losses resulting from provisions for legal proceedings denominated in foreign currencies. Legal provisions in foreign currencies primarily consist of Petrobras's portion of the class action settlement provision created in December 2017. The foreign exchange gains or losses on legal provisions are presented in other income and expenses for accounting purposes but management does not consider them to be part of the Company's primary business. In addition, they are substantially similar to the foreign exchange effects presented within net finance income. No adjustments have been made to the comparative measures presented as amounts were not significant in these periods.

This measure is used to calculate the metric Net Debt/ LTM Adjusted EBITDA, which is established in the business plan 2019-2023, to support management's assessment of liquidity and leverage.

Net Debt reflects the gross debt net of cash and cash equivalents, government bonds and time deposits from highly rated financial institutions abroad with maturities of more than 3 months from the date of acquisition, considering the expected realization of those financial investments in the short-term.

The Adjusted EBITDA is an alternative performance measure for the Company. This measure is being presented as a supplementary information to readers.

EBITDA, Adjusted EBITDA and Net debt/Adjusted EBITDA are not defined in the International Financial Reporting Standards – IFRS. Our calculation may not be comparable to the calculation of other companies and it should not be considered in isolation or as a substitute for any measure calculated in accordance with IFRS. These measures must be considered together with other measures and indicators for a better understanding of the Company's financial conditions.

* See definition of Adjusted Cash and Cash Equivalents, Net Debt, Total Net Liabilities, LTM Adjusted EBITDA, LTM OCF and Leverage in Glossary and reconciliation in Reconciliation of Adjusted EBITDA and LTM OCF.

Net Debt/Adjusted EBITDA Metric

The Net debt/Adjusted EBITDA ratio is an important metric used in our 2019-2023 Plan that supports our management in assessing the liquidity and leverage of Petrobras Group.

In order to translate the items comprising this metric into the presentation currency of the Company's financial statements (U.S. dollars), the Company applied the same foreign exchange translation method as set out IAS 21 - The Effects of Changes in Foreign Exchange Rates (see note 2.2 to financial statements 2018). Accordingly, assets and liabilities items were translated into U.S. dollars at the exchange rate as of the date of the statement of financial position, and all items pertaining to the statement of income and statement of cash flows were translated at the average rates prevailing at each quarter of the years.

The Company has pursued a 2.5 target ratio based on our net debt and Adjusted EBITDA computed in *reais* and, depending on the foreign translation effects on items that comprise this metric, the Net Debt/Adjusted EBITDA may significantly differ or even present a different trend when calculated in USD.

The following table presents, in both currencies, the reconciliation for this metric to the most directly comparable GAAP measure in accordance with IFRS, which is in this case the Gross Debt Net of Cash and Cash Equivalents / Net Cash provided by operating activities ratio:

	R\$ million		US\$ million	
	12.31.2018	12.31.2017	12.31.2018	12.31.2017

Net debt/Adjusted EBITDA ratio	2.34	3.67	2.20	3.53

VII. Foreign Exchange Translation Effects on Results of Operations of 2018

The main functional currency of the Petrobras Group is the Brazilian real, which is the functional currency of the parent company and its Brazilian subsidiaries. However, the presentation currency of this financial report is the U.S. Dollar to facilitate the comparison with other oil and gas companies. Therefore, the results of operations in Brazilian real were translated into U.S. dollars using the average exchange rates prevailing during the period.

When the Brazilian real appreciates against the U.S. dollar, the effect is to generally increase both revenues and expenses when expressed in U.S. dollars. When the Brazilian real depreciates against the U.S. dollar, as it did in Jan-Dec/2018, the effect is to generally decrease both revenues and expenses when expressed in U.S. dollars.

In order to isolate the foreign exchange translation effect on results of operations, the table below presents a reconciliation of income statement to financial information on a constant currency basis, assuming the same exchange rates between each quarter for translation. In 2018, the results on a constant currency basis were computed by converting the 1Q-2018, 2Q-2018, 3Q-2018 and 4Q-2018 results from Brazilian real into U.S. dollars based on the same average exchange rates used in 1Q-2017, 2Q-2017, 3Q-2017 and 4Q-2017 (3.1451, 3.2174, 3.1640 and 3.2466, respectively).

The amounts and respective variations presented in constant currency are not measures defined in the International Financial Reporting Standards – IFRS. Our calculation may not be comparable to the calculation of other companies and it should not be considered as a substitute for any measure calculated in accordance with IFRS.

The Adjusted EBITDA by Segment is an alternative performance measure of each segment of the Company. This measure is being presented as a supplementary information to the readers, may not be comparable to other companies and should not be considered in isolation or as a substitute for any measure calculated in accordance with IFRS.

* See definition of Adjusted EBITDA in glossary.

** Includes results with disposal and write-offs of assets and re-measurement of remaining interests at fair value.

X - Glossary

ACL - *Ambiente de Contratação Livre* (Free contracting market) in the electricity system.

ACR - *Ambiente de Contratação Regulada* (Regulated contracting market) in the electricity system.

Adjusted cash and cash equivalents - Sum of cash and cash equivalents, government bonds and time deposits from highly rated financial institutions abroad with maturities of more than 3 months from the date of acquisition, considering the expected realization of those financial investments in the short-term. This measure is not defined under the International Financial Reporting Standards – IFRS and should not be considered in isolation or as a substitute for cash and cash equivalents computed in accordance with IFRS. It may not be comparable to adjusted cash and cash equivalents of other companies, however management believes that it is an appropriate supplemental measure to assess our liquidity and supports leverage management.

Adjusted EBITDA – Net income plus net finance income (expense); income taxes; depreciation, depletion and amortization; results in equity-accounted investments; impairment, cumulative translation adjustment and gains/losses on disposal/write-offs of assets. Adjusted EBITDA is not a measure defined by IFRS and it is possible that it may not be comparable to similar measures reported by other companies, however management believes that it is an appropriate supplemental measure to assess our profitability. Adjusted EBITDA shall be considered in conjunction with other metrics for a better understanding on our performance.

Adjusted EBITDA margin - Adjusted EBITDA divided by sales revenues.

ANP - Brazilian National Petroleum, Natural Gas and Biofuels Agency.

Basic and diluted earnings (losses) per share - Calculated based on the weighted average number of shares.

Capital Expenditures – Capital expenditures based on the cost assumptions and financial methodology adopted in our Business and Management Plan, which include acquisition of PP&E and intangibles assets, investment in investees and other items that do not necessarily qualify as cash flows used in investing activities, primarily geological and geophysical expenses, research and development expenses, pre-operating charges, purchase of property, plant and equipment on credit and borrowing costs directly attributable to works in progress.

CTA – Cumulative translation adjustment – The cumulative amount of exchange variation arising on translation of foreign operations that is recognized in Shareholders' Equity and will be transferred to profit or loss on the disposal of the investment.

Domestic crude oil sales price - Average of the internal transfer prices from Exploration & Production to Refining, Transportation and Marketing.

Domestic natural gas production - Natural gas production in Brazil less LNG plus gas reinjection.

Effect of average cost in the Cost of Sales – In view of the average inventory term of 60 days, the crude oil and oil products international prices movement, as well as foreign exchange effect over imports, production taxes and other factors that impact costs, do not entirely influence the cost of sales in the current period, having their total effects only in the following period.

Feedstock processed – Brazil - Daily volume of crude oil and NGL processed.

Feedstock processed (excluding NGL) - Daily volume of crude oil processed in the Company's refineries in Brazil and is factored into the calculation of the Refining Plants Utilization Factor.

Free cash flow - Net cash provided by operating activities less acquisition of PP&E and intangibles assets, investments in investees and dividends received. Free cash flow is not defined under the IFRS and should not be considered in isolation or as a substitute for cash and cash equivalents calculated in accordance with IFRS. It may not be comparable to free cash flow of other companies, however management believes that it is an appropriate supplemental measure to assess our liquidity and supports leverage management.

Gross Margin - Gross profit over sales revenues.

Jet fuel – Aviation fuel.

Leverage – Ratio between the Net Debt and the sum of Net Debt and Shareholders' Equity. Leverage is not a measure defined in the IFRS and it is possible that it may not be comparable to similar measures reported by other companies, however management believes that it is an appropriate supplemental measure to assess our liquidity.

Lifting Cost - Crude oil and natural gas lifting cost indicator, which considers expenditures occurred in the period.

LNG - Liquefied natural gas.

LPG - Liquefied crude oil gas.

Net Debt – Gross debt less adjusted cash and cash equivalents. Net debt is not a measure defined in the IFRS and should not be considered in isolation or as a substitute for total long-term debt calculated in accordance with IFRS. Our calculation of net debt may not be comparable to the calculation of net debt by other companies. Management believes that net debt is an appropriate supplemental measure that helps investors assess our liquidity and supports leverage management.

Net Income by Business Segment - Company's segment results. Petrobras is an integrated energy company and most of the crude oil and natural gas production from the Exploration & Production segment is transferred to other business segments of the Company. Our results by business segment include transactions carried out with third parties, transactions between companies of Petrobras's Group and transfers between Petrobras's business segments that are calculated using internal prices defined through methodologies based on market parameters.

Net Margin - Net income (loss) over sales revenues.

NGL - Natural gas liquids.

OCF - Net Cash provided by (used in) operating activities (operating cash flow)

Operating indicators - Indicators used for businesses management and are not reviewed by independent auditor.

Operating Margin - Operating income (loss) over sales revenues.

PLD (differences settlement price) - Electricity price in the spot market. Weekly weighed prices per output level (light, medium and heavy), number of hours and related market capacity.

Reference feedstock or installed capacity of primary processing - Maximum sustainable feedstock processing reached at the distillation units at the end of each period, respecting the project limits of equipment and the safety, environment and product quality requirements. It is lower than the authorized capacity set by ANP (including temporary authorizations) and by environmental protection agencies.

Refining plants utilization factor (%) - Feedstock processed (excluding NGL) divided by the reference feedstock.

Total net liabilities - Total liability less adjusted cash and cash equivalents.
